

INTERSOS Legal Platform

A practical guide for colleagues who do not work with technical software

User guide - Legal Platform 1.0.17

The Legal Platform turns prepared CSV files into clear reviews, charts, case tables and exports.

Use it to check data quality, follow legal work, review detention and deportation records, and prepare reports.

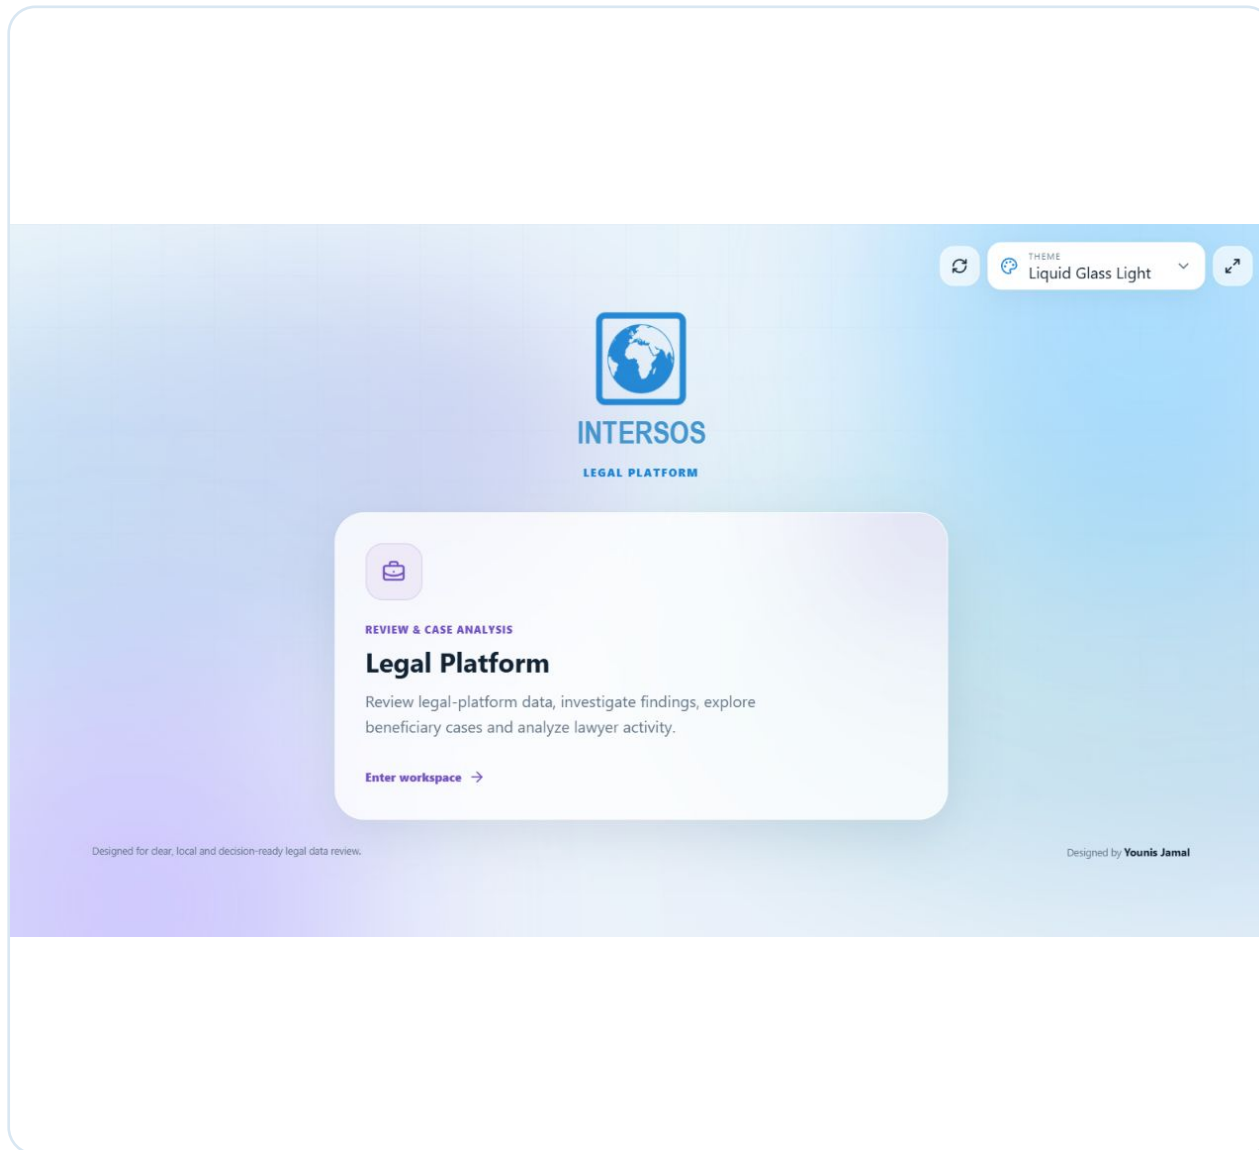

It does not replace the source files. Corrections should be made in the approved source data, then refreshed in the platform.

Use only the approved Legal Platform data folder or the approved set of CSV files.

Close the source files in Excel before refreshing if Windows says a file is locked.

Keep exported files in an approved location. They may contain confidential case information.

1. Launch INTERSOS Legal Platform. It opens directly on Legal Platform Overview.
2. If no source is loaded, choose Data source, then select a folder or the required CSV files.
3. Select a page from the left menu, apply filters, and review the totals before using the details.
4. Use Clear to remove filters. Use Excel or Download only when you need an approved working copy.

Home contains one workspace: Legal Platform.

The left menu opens every Legal page. Minimize gives the table more room. Full screen is useful for presentations.

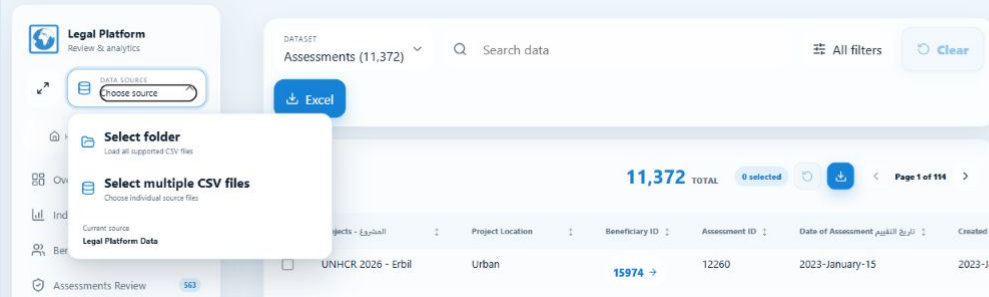

Returning Home does not unload the selected data source.

Choose a folder when all approved CSV files are stored together. Choose CSV files when the files are stored separately.

The platform remembers the last Legal source. If it is moved or unavailable, the app asks you to choose a new source instead of silently loading another one.

Refresh selected source after the source files are updated.

Filters narrow the results. Clear returns to the unfiltered view. Search finds matching records in the current table.

Total shows all matching records. Selected shows the rows marked with checkboxes. Page changes the visible group of rows.

Excel downloads a workbook. Download selected exports only checked rows when that option is available.

Click a Case ID or Beneficiary ID when it is shown as a blue link to open the case details.

See headline totals and operational trends before opening detailed tables.

Use chart filters to focus on a period, project or location.

Choose the reporting filters, review the calculated indicators, then export the approved table or narrative.

The screenshot displays the 'Legal Platform' interface for 'Indicator Reporting'. The top navigation bar includes 'Indicators' and 'Analysis' tabs. Below the tabs are filter dropdowns for 'All proj...', 'All co...', 'All qua...', and 'All mo...', along with 'Clear', 'Narrative', and 'Excel' buttons. The left sidebar lists various modules: Home, Overview, Indicator Reporting (selected), Beneficiaries Review (154), Assessments Review (563), Legal Services Review (175), Awareness Review (0), Detention Cases, Deportation, Lawyer Overview, Analytics Studio, and Data Explorer. The main content area is titled 'Refugee' and shows '6 INDICATORS'. It features a summary card for '# of persons identified in detention (with immigration related charges)' with a total of 1,679. Below this is a table titled 'SYRIAN REFUGEES' with columns for 'PROJECT', 'PROJECT LOCATION', 'MALE' (subdivided into age groups: 00-04, 05-11, 12-17, 18-39, 40-59, 60+), and 'FEMALE' (subdivided into age groups: 00-04, 05-11, 12-17). The table lists data for various locations including Erbil Urban, Kawrgawsk Camp, Basirma Camp, Darashakan Camp, Qushtapa Camp, Sulaymaniyah Urban, and Pshdar Urban (Refugees) + Rania.

PROJECT	PROJECT LOCATION	SYRIAN REFUGEES								
		MALE						FEMALE		
		00-04	05-11	12-17	18-39	40-59	60+	00-04	05-11	12-17
Erbil	Urban	6	14	18	47	15		6	15	2
Erbil	Kawrgawsk Camp									
Erbil	Basirma Camp									
Erbil	Darashakan Camp									
Erbil	Qushtapa Camp									
SULI	Suleymaniyah Urban	4	1	20	93	3		1	5	
SULI	Pshdar Urban (Refugees) + Rania									

Select one or more quality checks. Review the finding and recommended action, then correct the approved source file.

This page is available when an awareness CSV is included. Use it to review session records and data-quality findings.

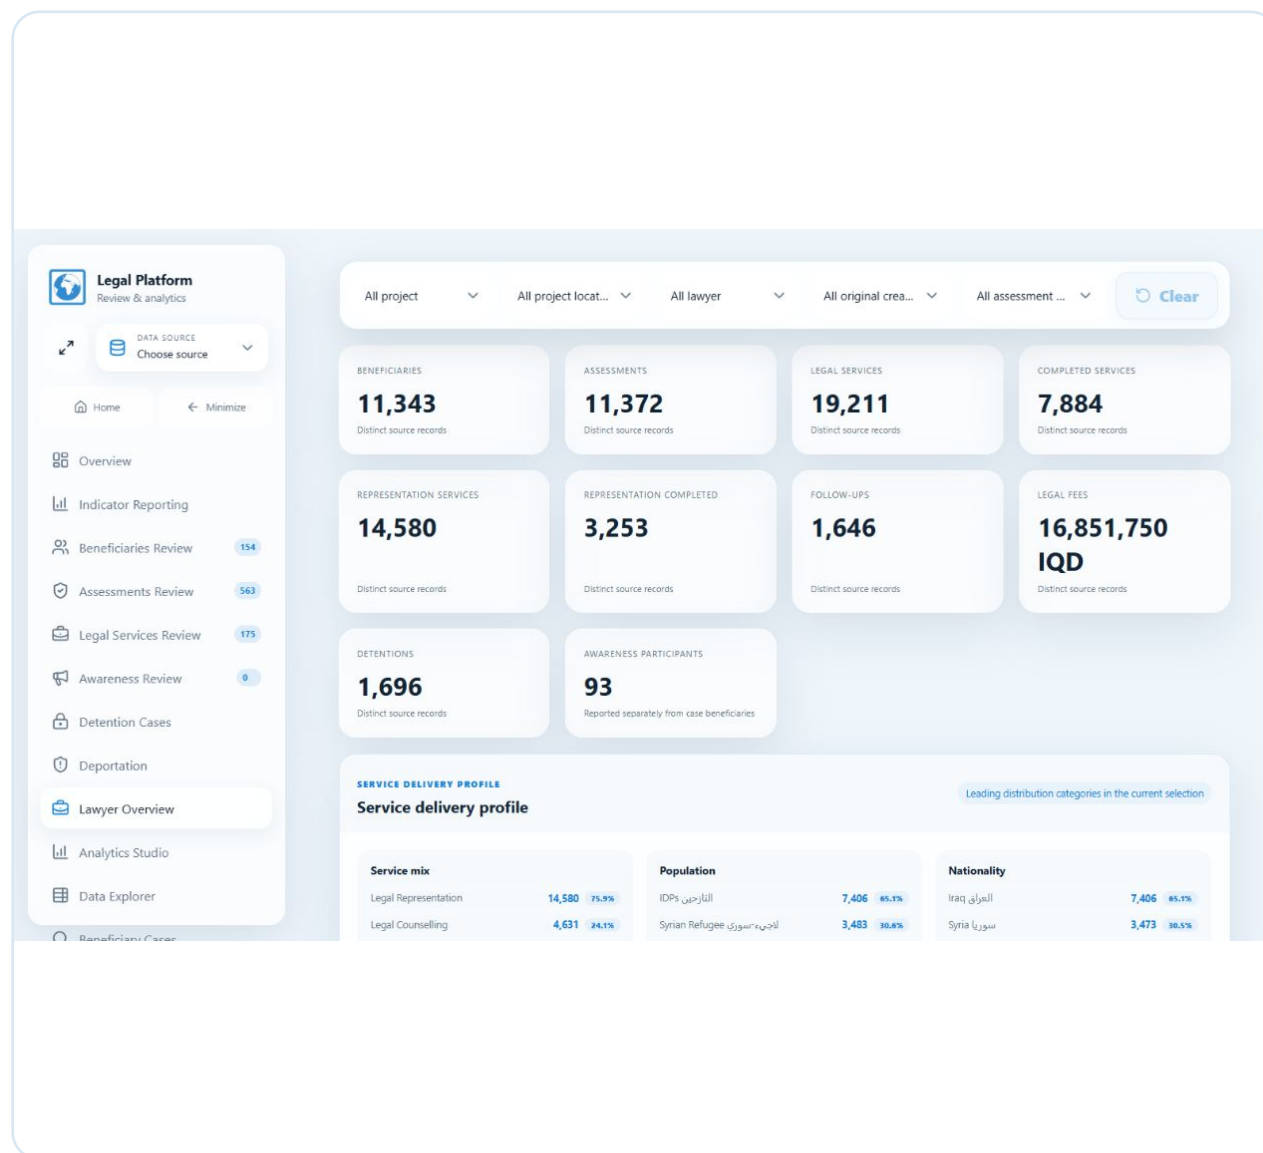

Analysis shows totals and trends. Detention detail table lists matching cases. Monthly Excel reconciliation compares a monthly workbook with platform data.

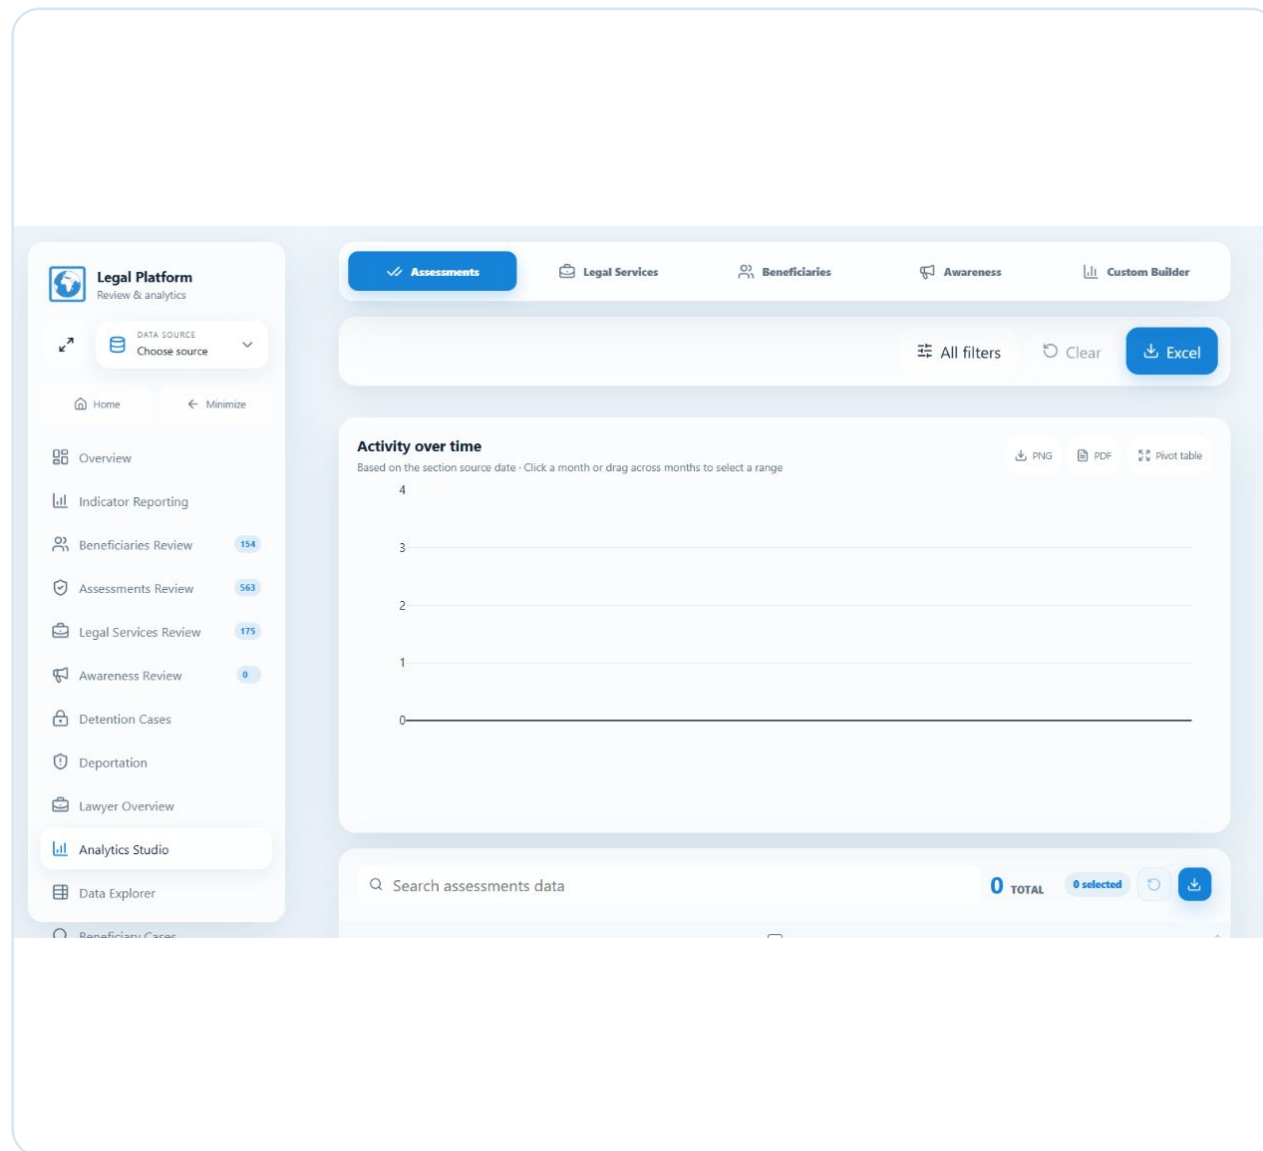

Use the top filters for the whole page. When scrolling, the compact Filters and Clear controls remain available.

Review workload, delivery and selected-project totals. Awareness appears only when the selected data includes the AMAL project.

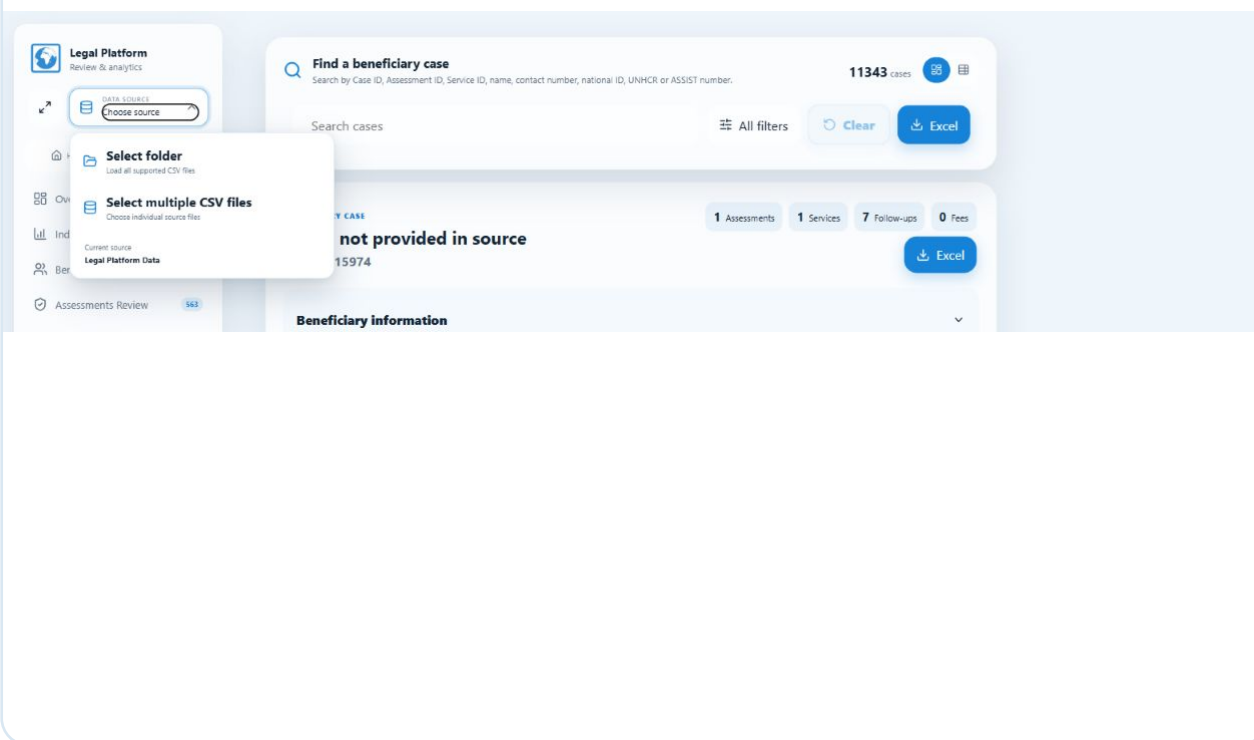

Choose Assessments, Legal Services, Beneficiaries or Awareness. Apply filters, review charts, then use the table below for records. Custom Builder creates a chart without changing source data.

Choose a dataset, search or filter, select rows if needed, and export. Blue IDs open the same case details popup used elsewhere.

The screenshot displays the 'Legal Platform' interface for data exploration. The main header shows 'Assessments (11,372)' with a search bar and 'All filters' button. A sidebar on the left contains navigation links: 'Legal Platform', 'Review & analytics', 'DATA SOURCES', 'Select folder', 'Select multiple CSV files', 'Current source', 'Legal Platform Data', and 'Assessments Review'. The main content area shows a table with columns: 'Projects - المشاريع', 'Project Location', 'Beneficiary ID', 'Assessment ID', 'Date of Assessment التاريخ', and 'Created on'. The table displays one row with the following data: 'UNHCR 2026 - Erbil', 'Urban', '15974', '12260', '2023-January-15', and '2023-Ja'. A blue arrow next to the '15974' ID indicates it is a clickable link. The table also shows '11,372 TOTAL' and '0 selected'.

Projects - المشاريع	Project Location	Beneficiary ID	Assessment ID	Date of Assessment التاريخ	Created on
UNHCR 2026 - Erbil	Urban	15974 →	12260	2023-January-15	2023-Ja

Search and filter cases, switch between card and table views, and click the Case ID to open details. Selected-case exports include relevant sheets; empty Follow-ups or Fees sheets are omitted.

Last source unavailable: select the correct folder or CSV files again. The platform will not substitute another source.

Missing page or empty chart: confirm the related CSV file exists and contains records for the selected filters.

Unexpected total: clear filters, confirm the reporting period, then compare with the approved source file.

Download does not open: check the Downloads folder and confirm that Excel is installed.

Never share screenshots or exports containing names, contacts, Case IDs or legal details through unapproved channels.

Correct Legal source selected

Reporting period and project filters confirmed

Totals checked before reading individual rows

Clear used before starting a new question

Exports saved only in an approved location

Source data corrected and refreshed when an issue is found
